

AWS re/Start Program

3 months course
courses finish every 3-4 months

English (min. B2)
German (min. B1)

Berlin. Düsseldorf. Hamburg. Leipzig.
Frankfurt. Munich. Online.

Aim of the course

AWS re/Start is a skills development program that prepares learners for careers in the Cloud field. Through scenario-based learning and hands-on labs, learners gain the technical skills they need for entry-level cloud roles. AWS re/Start also focuses on building professional skills such as adaptive communication, time management, and collaboration. The program's mission is to build a diverse pipeline of entry-level cloud talent.

General requirements

No programming knowledge, but advanced technical knowledge required, at least a intermediate secondary school diploma, high school diploma or general university entrance qualification, successful completion of an orientation measure or assessment in the IT field.

Curriculum

Based on our cooperation with AWS re/Start, the curriculum of this AWS re/Start Cloud Consultant course is under the consistent alignment towards the requirements of this new working environment.

Cloud Foundations

Containing various learning objectives related to support, operation and automation, such as Linux, Network, IT security, coding, Python and databases. Gaining a fundamental understanding of a future position within a company and getting to know the context someone needs for an intended career as AWS Cloud Consultant.

7 Weeks

AWS Core Services

Gaining substantial knowledge about the core services of AWS, starting with basic introductions up to the implementation of extensive operational workflows. In order to map real processes, the technical part of the curriculum is mostly practical oriented and includes the implementation of a project from the idea to reporting.

7 Weeks

Preparation for Exam and Job Applications

Preparing for the final certification, followed by the exam which will take place in an authorized examination centre. After the successful graduation of the AWS re/Start program, graduates will be awarded the internationally recognized AWS Certification as an AWS Certified Cloud Practitioner.

7 Weeks

MO - DO / 9 AM - 5.45 PM

Where do graduates work?

By gaining this certification, graduates will be well prepared for entry-level positions in the field of cloud applications at IT companies, AWS customers and APN partners.

What else do we offer?

Besides teaching the foundations of AWS, we focus on the entire package. Therefore, our courses include mentoring sessions, soft skills training and employability skills, event sessions as well as labs and assessments.
