

**Berlin. Dusseldorf. Hamburg.  
Leipzig. Frankfurt. Munich.  
Online.**

Want to become a Freelancer, Digital Nomad, or work in your dream tech company? Become a Java backend developer and work in a dynamic and vital field in today's society. As a Java backend developer, you can show your creativity, become part of the Tech Disruption, build Websites, Web Apps, and much more.

Along with industry experts, we have created an application-oriented curriculum that prepares our students for the job. The curriculum is tailored to people of all ages, experiences, and knowledge.

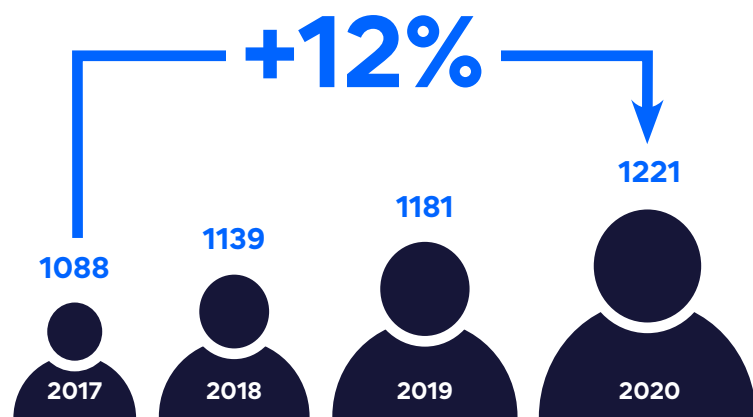

Digital Career Institute was founded in 2016 as an initiative to integrate refugees into digital jobs in Germany. DCI set the goal to increase the amount of skilled workers in the constantly growing digital industry

 Our Java course starts every **3 months.**

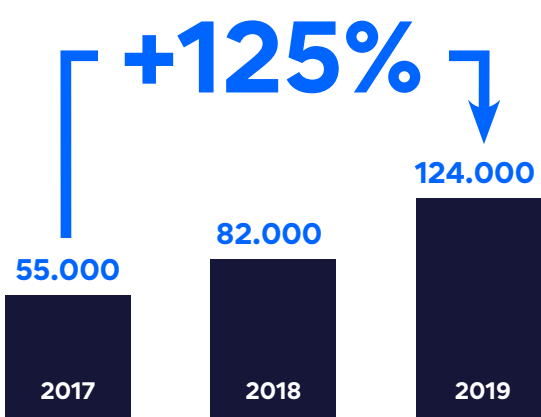

## Current numbers from the tech job market

**Employees in the information and communication technology sector (in thousands).**
